1. Read the passage given below and answer the questions that follow:

The college was closed on Saturday last on account of fine day. The sky was overcast with clouds. A pleasant breeze was blowing. The birds were chirping on the branches of the trees. It was indeed a very pleasant morning. Three friends Rama, Ganga and Mohan thought of spending the day out on the banks of the river. They spent it in playing games, eating fruits and sweets, and singing songs.

They could not resist the temptation of taking a plunge into the river. Rama and Mohan were expert swimmers. They were soon ahead of Ganga with their quick and vigorous strokes. The latter was yet a novice, but fired by a spirit of emulation, he tried to overtake them. He had hardly fought with the current for five minutes, when he found that it was too strong for him, that his whole strength was ebbing fast and that he was on the point of being engulfed. He cried for help, but his companions were too far ahead to hear his cry. He became hoarse after repeated cries, but there was no response. The poor miserable boy was being tossed up and down by the whirling waves, his whole strength was exhausted, and his condition was most critical. A minute or two more, and he would have gone to his watery grave. Suddenly his companions looked back to see how far their friend Ganga was left behind. They saw him exhausted and struggling hard against the strong and swift current. Both of them, lusty swimmers as they were, rushed to his rescue, caught hold of him firmly by his arms and brought him safely to the bank. They thus saved the boy from the very jaws of death. They thanked God whose divine mercy had saved the boy and were happy that their trip had not ended in tragedy.

Our earth has a fine layer of soil at the surface. All plants grow in this soil only. Under the soil, there are rocks of various kinds. Nature takes millions of years to form an inch of soil in thickness. But sometimes a single heavy shower can wash it off. Such a thing doesn't happen in places where we have forests or lots of trees. The roots of trees hold the soil together and protect it from being washed off.

2001/ (Set : A) P. T. O.

We value trees not only for their usefulness, but also for their beauty. They refresh the eyes and bring peace to the mind. That is why our ancient *rishis* were attracted to the forests. They lived in their forest homes or ashramas in the company of nature. It was in these ashramas that they taught their pupils. When Gurudev Rabindranath Tagore started a school, he also chose a place full of trees. He called it Shantiniketan or the Home of Peace.

There was a time when our hills, mountains and even plains were covered with huge forests. As the population grew, trees were cut down to meet the demand for fuel and timber. Thus our wonderful forests came to be destroyed. Now we don't have enough trees to give us firewood even. So people are forced to burn cattle dung which ought to be saved for use as manure. Cattle-dung is very necessary to maintain the fertility of soil. Chemical fertilizers alone can't help. In many areas, where only chemical fertilizers are used, the crop yields have started falling.

There is another grave danger. Now we don't have enough trees to treat all the carbon dioxide that is being produced in our homes, factories and by our autos. The air remains polluted and it can give us a number of serious diseases.

Trees are man's best friends. They are God's greatest gift to man. They are the invaluable wealth of a nation. It is our sacred duty to protect them and look after them well. For every tree that is cut down, we must plant at least two new trees and take care of them. If we don't care for trees, they too will stop caring for us. And then, imagine what will happen!

Questions:

 $1 \times 4 = 4$

- (i) We value trees for:
 - (a) Beauty
 - (b) Usefulness

- (5)
- (c) Both beauty and usefulness

2001/ (Set : A) P. T. O.

give every man a chance of being a saint, a man of science and an artist. But this problem cannot be solved unless men desire to be saint, men of science or artists. And if they are to desire that continuously they must be taught what it means to be these things. We think of the man of science, or the artist if not of the saint, as a being with peculiar gifts who exercises more precisely and incessantly perhaps, activities which we all ought to exercise. It is a common place belief now that art has ebbed away out of our ordinary life, out of all the things which we use, and that it is practised no longer by workmen but only a few painters and sculptors. That has happened because we no longer recognize the aesthetic activity as an activity of the spirit and common to all men. We do not know that when a man makes anything he ought to make it beautiful for the sake of doing so, and that when a man buys anything he ought to demand beauty in it for the sake of that beauty. We think of beauty, if we think of it at all, as a mere source of pleasure, and therefore it means to us an ornament added to things for which we can pay extra as we choose. But beauty is not an ornament to life, or the things made by man. It is an essential part of both.

I remember a story a man from Udipi once told me. As a young boy he would go to school past an old temple, where his father was a priest. He would stop briefly at the temple and pray for a pair of shoes. Thirty years later I visited his town and the temple, which was now drowned in an air of desolation. In the backyard, where lived the new priest, there were red and white plastic chairs. A young boy dressed in a grey uniform, wearing socks and shoes, arrived panting and threw his school bag on a folding bed. Looking at the boy, I remembered the prayer another boy had made to the goddess when he had finally got a pair of shoes let me never lose them" The goddess had granted his prayer. Young boys like the son of the priest now wore shoes. But many others like the ragpickers in my neighbourhood remain shoeless.

1. Read the passage given below and answer the questions that follow:

2001/ (Set: B) P. T. O.

The eastern skies were turning slowly from black to pale green with the coming of dawn, and we still had not found our elusive amphibian. The hunters explained that it was useless continuing the search once it was light, for then the frog would not show itself. This meant that we had some two hours left in which to track down the beast and capture it. At last damp, cold and dispirited we came to a broad flat valley filled with great boulders through which a stream picked its way like a snake.

We had moved about half-way up this valley when I decided to break off for a cigarette. I came to a small pool that lay like a black mirror ringed all around with tall rocks. Choosing a smooth dry stone to sit on I switched off my torch and sat down to enjoy my smoke.

Almost immediately afterwards something jumped into the pool with a loud plop. I switched on my torch quickly and shone it on the surface of the water, but there was nothing to be seen. Then I flashed the beam across on the moss-covered rocks which formed the lip of the pool. There, not a yard from where I was sitting, squatting on the extreme edge of a rock. sat a great, gleaming, chocolate-coloured frog. His fat thighs and the sides of his body were covered with a tangled belt of something that looked like hair. I sat there hardly daring to breathe, for the frog was perched on the extreme edge of the rock, overhanging the pool; he was alert and suspicious, his legs bunched ready to jump. If he was frightened, he would leap straight off the rock and into the dark waters. For perhaps five minutes I remained as immobile as the rocks around me, and gradually, as he got used to the light, the Hairy Frog relaxed.

As we alighted from the plane onto the tarmac of one of the smallest international airports in the world, a picture perfect sight greeted us. A quaint airport terminal surrounded by green mountains, so tranquil and beautiful even on a wet, grey morning, it simply took our breath away. We had landed in the kingdom of Bhutan, one of the most isolated nations in the world with more than 70 percent of the harsh terrain under forest cover.

2001/ (Set : B) P. T. O.

Our holiday was luxurious enough for the first couple of days in Thimpu and Paro. We saw the national animal, the Takin and the Dzongs that serve as the administrative and religious nerve centres.

We were put to test soon enough on a half-day trip to Taktsang, the most revered temple in Bhutan. The temple is perched high on a granite cliff some 800 mtr. above the Paro valley and the walk through the beautiful forests of poplar and pines is about 10 kms. in all. It gave us an idea of the terrain we would be up against and it possibly helped reassure our trek guide.

For the first time we encountered the ingenuous Bhutanese system of using running streams to power a rotating prayer wheel and tinkling bell.

The next day, armed with walking sticks, light jackets, sun caps and high spirits, we set off. Enjoying the sunny weather, we walked through small villages and scenic farmlands on our way into the wilderness. For the first three days of our trial followed the fresh water river, the Paro Chhu through forest of blue pine-thick with the dangling Spanish Moss that is believed to be an indicator of the level of the oxygen in the air. The mountains were never far away in this stunning scenario.

- **2.** Read the following passage carefully and make notes on it using headings and sub headings. Supply an appropriate title also : 4 + 1 = 5

There is an enemy beneath our feet-an enemy the more deadly for his complete impartiality. He recognizes no national boundaries, no political parties. Everyone in the world is threatened by him. The enemy is the earth itself. When an earthquake strikes, the world trembles. The power of a quake is greater than anything man himself can produce. But today scientists are directing a great deal of their effort into finding some way of combating earthquakes, and it is possible that at sometime in the near future mankind will have discovered a means of protecting itself.

An earthquake strikes without warning. When it does, its power is immense. If it strikes a modern city, the damage it cause is as great as if it has struck a primitive village. Gas mains burst, explosions are caused and fires are started. Underground railways are wrecked.

Whole buildings collapse, bridges fall, dams burst. Gaping crevices appear in busy streets. If the quake strikes at sea, huge tidal waves

2001/ (Set : B) P. T. O.

sweep inland. If it strikes in mountain regions, avalanches roar down into the valley. Consider the terrifying statistics from the past. 1755: Lisbon, capital of Portugal – the city destroyed entirely and 450 killed. 1970: Peru-50,000 killed.

In 1968, an earthquake struck Alaska. As this is a relatively unpopulated part, only a few people were killed. But it is likely that this was one of the most powerful quakes ever to have hit the world. Geologists estimate that during the tremors, the whole of the state moved over 80 feet farther west into the Pacific Ocean. Imagine the power of something that can move an entire subcontinent! this is the problem that faces the scientists. They are dealing with forces so immense that man cannot hope to resist them. All that can be done is to try to pinpoint just where the earthquake will strike and work from there. At least some precautionary measures can then be taken to save lives and some of the property.

During one of the long dark evenings just before Christmas, the master Smith and his helper sat in the dark forge near the furnace waiting for the pig iron, which had been put in the fire, to be ready to put on the anvil. All the time there were many sounds to be heard in the forge. The big bellows groaned and the burning coal cracked. 1. Read the passage given below and answer the questions that follow:

All round development of man is the true aim of education. It should train not only the head, but also the hands and the heart. But our present system of education has miserably failed to achieve this aim. It suffers from many grave defects.

The present system of education was founded by the British for their own convenience. Lord Macaulay was the father and founder of this system. He wanted it to produce clerks to help the British in running their administration. Today the English have gone but the same old system of education still continues. We are free but we are still slavishly following the system evolved by the British. This system of education has many defects. It must be changed and overhauled.

The great defect in our present system of education is that it is too theoretical. An educated man has only bookish knowledge. He knows nothing about practical things. He finds that his education has not made him fit to do any useful work for his society.

The present system of education does not teach us the dignity of labour. A student is not taught or trained to do things with his hands. Manual or physical labour finds no place in education. Educated young men are fit only to be clerks in office. They look down upon manual labour. They consider it below their dignity to work with their hands in fields or factories.

Vocational education is the need of the hour. We need more and more technicians, engineers and doctors. But the number of vocational institutions-Engineering and Medical Colleges, Polytechnics and ITI's-is limited. A large number of young men and women, who can do well as technicians are deprived of technical or vocational training.

Reading books is one of the best kind of amusement which a man has after the day's hard work. It is better to be a poor man living in a garett with plenty of books than be a king who does not love reading. Books contain the history of our race, the accumulated knowledge and experience of ages, the best that ever has been thought and said.

2001/ (Set : C) P. T. O.

(4)

Books fill our mind with ideas and good happy thoughts. They comfort and console us during our time of difficulties. Books turn our dull, disgusting and despairing moments into delight. They present before us the beauties of nature. When we read a good book, it seems as if the kings and the palaces they live come alive to our mind's eye. We seem to transport ourselves to the mountains or sea shore and visit the most beautiful and virgin parts of the earth without putting in any bodily exertion and expense. Good and entertaining books linger in our mind for longer time and become the source of our bright and happy thoughts. They are our true and life-long friends who never fail us. They give us the purest, the most durable and the most exquisite of all human happiness. We should develop a taste for reading good books.

Questions:

- **2.** Read the following passage carefully and make notes on it using headings and sub headings. Supply an appropriate title also: 4 + 1 = 5

The nine-letter word "interview" can perspire the most knowledgeable and strong people in the world. In modern times, your prospects depend on the success of an interview.

First, an academic question: 'What is an interview?' It is a discussion in which an interviewer faces a candidate for a short while and asks questions to probe his knowledge and awareness of the subject. These are done to assess the personality of the interviewee. It is a very formal means of interaction with one person facing a group of persons, each of whom is a specialist in his or her field.

For a successful interview, you have to understand that knowledge is an important component of success. Knowledge has two aspects: range and depth. The former implies that you should know a lot beyond your specialization and the latter means an awareness of the various aspects of the topic under discussion. An indepth knowledge is gained through reading and listening.

Next comes appearance, which means your dress for the interview. You must be elegantly attired for the occasion. But remember: going for an interview is different from attending an evening party. Wear a simple outfit that suits your physique and features. Casuals like Kurtapyjamas, jeans, T-shirt or Kolhapuris should not feature in your selection of dress.

2001/ (Set : C) P. T. O.

Conducting yourself in the apt way is equally significant. The way you move yourself, sit on the chair, place your hands and your briefcase and talk to the members reflect your behavior. Expression is the most important aspect of the interview. For good expressions, what you need is clarity of mind and speech. Show your balanced thinking to convey your views clearly. Choose your words carefully. Use right words of normal usage, and abstain from verbosity. Avoid making ambiguous statements. Convey your point of view effectively. Create an impact through your expressions. Give the impression of being a leader. Show that you can cooperate and get it.

7. Read the passage given below and answer the questions that follow:

Months passed. Shukla was sitting on his haunches at the appointed spot in Calcutta when Gandhi arrived; he waited till Gandhi was free. Then the two of them boarded a train for the city of Patna in Bihar. There Shukla led him to the house of a lawyer named Rajendra Prasad who later became President of the Congress Party and of India. Rajendra Prasad was out of town, but the servants knew Shukla as a poor yeoman who pestered their master to help the indigo sharecroppers. So they let him stay on the grounds with his companion, Gandhi, whom they took to be another peasant. But Gandhi was not permitted to draw water from the well lest some drops

Subbu was the No. 2 at Gemini Studios. He couldn't have had a more encouraging opening in films than our grown-up make-up boy had. On the contrary, he must have had to face more uncertain and difficult times, for when he began his career, there were no firmly established film producing companies or studios. 1. Read the passage given below and answer the questions that follow:

Grammar can be a way of comparing different language. To most people, grammar is a set of rules for speaking and writing a language correctly. Usually, before you can speak any language well-even your own language which you have gradually been learning since you were little-you have to know something about its grammar. Small children start to pick up the grammar of their own language almost by instinct, by hearing how their parents talk and seeing how words are put together in sentences in the books they read. Before long, they learn that some expressions sound wrong or are 'bad grammar', such as 'the boys fighted for an hour instead of 'the boys fought for an hour'. By being exposed to the language over a period of time, they eventually know how to say the right things and avoid saying the wrong things in order to be understood.

However, when children begin to learn a foreign language, they find that they have to set about deliberately learning its grammar rules by heart. It is not simple to know the words of a new language, or a person could learn it just by reading a dictionary. The words by themselves do not mean very much until they are fitted together to form sentences, and it is grammar that shows how to do this.

When you learn grammar, you learn how to make words work for you, and you also learn a great deal about the way words behave. For instance, you find out that words are divided into different classes according to what they do. The words that name things, such as horse or train, are called nouns. Action words like run and see are verbs and there are several other kinds. They are called parts of speech.

Questions: $1 \times 4 = 4$

- (i) How do small children pick up the grammar of their language?
 - (a) By instinct
 - (b) Parents talk
 - (c) Words put in sentences in book

- (d) All of the above
- (ii) How do children learn to say the right things and avoid saying bad things? It is due to their exposure to language over:
 - (a) A period of time
 - (b) One hour
 - (c) Two months
 - (d) Three years
- (iii) What do you do when you learn grammar?
 - (a) Learn to make words work for you
 - (b) The way words behave
 - (c) Both (a) & (b)
 - (d) Neither (a) nor (b)
- (iv) What is required for learning a foreign language?
 - (a) Learn grammar rules by heart
 - (b) Learn grammar rules by brain
 - (c) Learn but instinct
 - (d) Nothing required

Good communication skills require a high level of self-awareness. Understanding your personal style of communicating will go a long way towards helping you to create a good and lasting impression on others. By becoming more aware of how others perceive you, you can adapt more readily to their styles of communicating. This does not mean you have to be a chameleon, changing with every personality you meet. Instead, you can make another person more comfortable with you by

(4)

selecting and emphasizing certain behaviours that fit within your personality and resonate with another. In doing this, you will become an active and patient listener. We should use non-verbal behaviours to raise the channel of interpersonal communication. Non-verbal communication is often, referred to as body language, facial expressions like smile, gestures, eye contact, and even your posture. This shows the person you are communicating with that you are indeed listening actively and will prompt further communications while keeping costly, time-consuming misunderstandings at a minimum.

Questions:

 $1 \times 4 = 4$

- (i) What is the basic requirement of good communication skills?
 - (a) Self-awareness
 - (b) Self esteem
 - (c) Self-study
 - (d) Self-requirement
- (ii) What will your personal style of communication do?
 - (a) No impact
 - (b) Create good image
 - (c) Help earn job
 - (d) Create a good and lasting impression on others
- (iii) How can we raise the channel of interpersonal communication?
 - (a) By using non-verbal behaviour
 - (b) Verbal behaviour
 - (c) Both (a) & (b)
 - (d) Neither (a) nor (b)
- (iv) What does non-verbal communication refer to?
 - (a) Body language

- (c) Posture
- (d) All of the above
- **2.** Read the following passage carefully and make notes on it using headings and sub headings. Supply an appropriate title also : 4 + 1 = 5

A headache is usually caused due to spinal misalignment of the head, due to poor posture. Sleeping on the stomach with the head turned to one side and bending over positions for a long time make it worse.

In migraine headaches (One handed headaches), the pain is usually on one side of the head and may be accompanied by nausea, vomiting, irritability and bright spots of flashes of light. This headache is made worse by activity, especially bending. The throbbing pain in the head gets worse by noise and light. Certain triggers for migraines may be chocolate eating, smoking or MSU in certain food items. The pain may last from eight to 24 hours and there may be a hangover for two-three days.

Migraines are often preceded by an 'aura' - changes in sight and sensation. There is usually a family history of migraine.

In a headache the pain originates not from the brain but from irritated nerves of muscles, blood vessels and bones. These send pain signals to the brain which then judges the degree of distress and relays it at appropriate sites. The pain may sometimes be referred to sites other than the problem areas. This is known as referred pain and occurs due to sensation overload. Thus, though most headaches start at the base of the skull the referred pain is felt typically behind the eyes.

Factors causing headaches are not fully understood but it is known that a shift in the level of body hormones and chemicals, certain food and drinks and environmental stress can trigger them. If headaches trouble you often, visit the doctor, who will take a full health history relating to diet, lifestyle stresses, the type of headache, triggering factors and relief measures. You may be asked to keep a 'headache diary' which tells you to list the time the headache started, when it ended, emotional, environmental and food and drink factors which may

have contributed to it. The type and severity of pain and medications used which provided most relief, are also to be listed.

This helps the doctor in determining the exact cause and type of headache and the type of drugs to use. Apart from this a physical examination is done to rule out any serious underlying cause. The blood pressure is recorded, vision tested and muscle coordination of the eyes is checked to rule out these as causes. Blood tests may be done out anaemia, diabetes and thyroid disease. If any of the above is abnormal or otherwise a CT Scan or MRI may be done to see tissues and structures around the brain. These will rule out causes such as tumors, haemorrhage and infection of the brain. This examination gives a clear picture of the problem to the doctor.

Immediate relief can be certain medications and few simple self-care techniques. Using ice against the pain 'site', covering eyes with dark glasses, drinking plenty of fluids and lying down in a dark and quiet room provide relief in a migraine attack. Pain killers like aspirin, Ibuprofen (brufen) and crocin can be taken and provide relief in different proportions. These should be used with caution and under medical supervision if used for long periods and large quantities as all of them can cause many side effects. An antiemetic like perionorm can help the nausea associated with a migraine.

7. Read the passage given below and answer the questions that follow:

Film-making must have been and was so easy with a man like Subbu around and if ever there was a man who gave direction and definition to Gemini Studios during its golden years, it was Subbu, Subbu had a separate identity as a poet and though he was certainly capable of more complex and higher forms, he deliberately chose to address his poetry to the masses. His success in films overshadowed and dwarfed his literary achievements—or so his critics felt. He composed several truly
